

Professional Portrait Photography Session

Professional Photography is significant. We share these images to introduce new members of our family with a birth announcement and show our friends and family where we are every year in a holiday portrait. Photography shows up in albums and prints, on social networking sites, resumes, reunions, memorials, and in online galleries. Portraits can be playful or serious, candid or posed... what you get out of this is up to you. Shoots are typically 1-2 hours and I will shoot many poses and backgrounds as you like at the location you choose (I am also happy to suggest locations). My goal is to put you at ease so that the images reflect your most authentic self. I am a lifestyle photographer and I love to use what ever backgrounds and "props" we find on site and embrace the moods and weather conditions present on shoot day. Book sessions at least 3 weeks in advance.

Services available for Newborns + High School Seniors + Families + Children + Individuals + Boudoir + Maternity + Weddings
